

Geography unit assignment

By: Adamo

Kelowna

Kelowna

Physical landforms

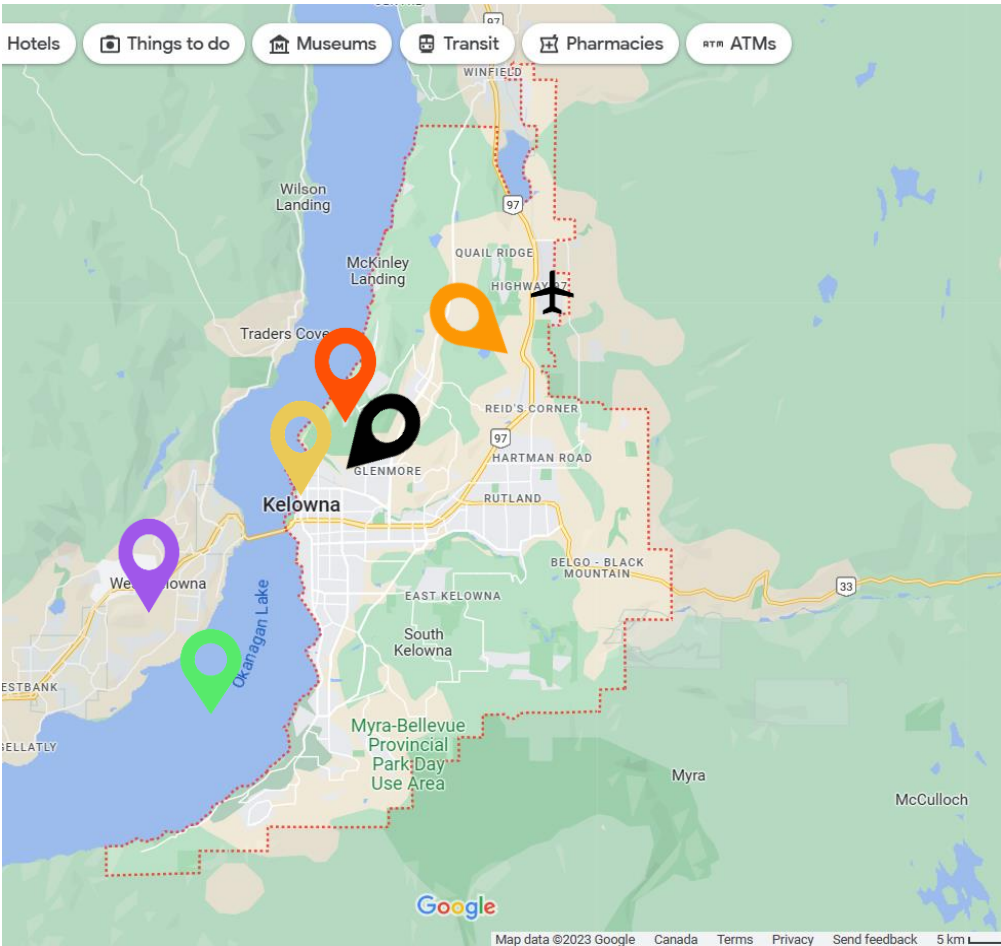

- Tectonic activity formed mountains
- Glaciations carveout between mountains
- Because the climate is good for trees to grow People doing clean up and people who cut down trees make lots of profit from the trees

Climate characteristics

- Dry due to rain shadow.
- Moderate temperature, mountains protect from rain
- It is dry and moist, so it is perfect climate for Wine makers, and it is always hot for ice cream shops

Vegetation characteristics

- Mostly grass land some pine forests, some agriculture and less rain
- Good soil and it is hot so Famers and stores that sell fruit and vegetables make lots of profit
