

LET'S TALK: TEEN SUICIDE

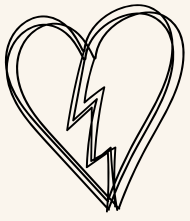

CURRENT TEEN DEATHS

The recent death of two teens named Romeo and Juliet was devastating. The teens were lovers who felt like their only escape from a feud between their families was to commit suicide. Romeo passed away by ingesting poison given to him by an apothecary. Juliet was found dead with stab wounds she inflicted on herself.

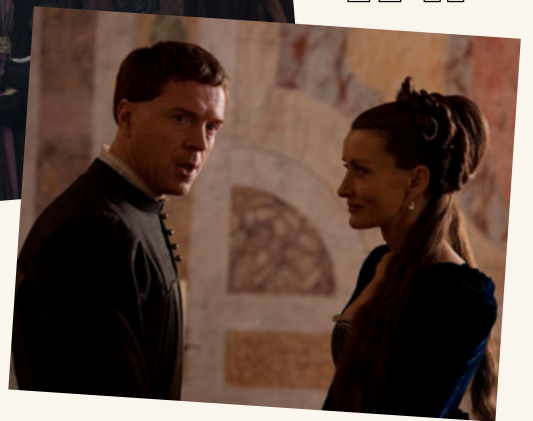

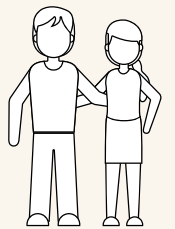

EFFECT ON VERONA

Teen suicide has a devastating impact on Verona. The shock and grief that the community feels after a passing of a fellow citizen can be very overwhelming. After the tragedy of Romeo and Juliet, Verona's affluent families have been taking their space to grieve. These two families have a large impact on Verona and without their influence, our city has been left in shambles.

SUPPORT FROM PARENTS

In order to help our children when their mental health is in a negative state, we need to communicate with them. By talking with your children you are giving them a safe space to talk about their emotions. Another key component in supporting your child is to listen to their wants and needs. Doing this will show them that you truly care about their needs and feelings.

HOW TEENS CAN GET HELP

Due to the recent suicides in Verona, we have created a support system for teens to reach out for extra support. This support system allows teens to send letters back and forth with doctors to help them through their mental health struggles. You may also request to speak with a doctor in person. As the Prince, I realize that measures must be taken to ensure the safety of our community.
