

Brochure- Reflection

When I started this whole unit, I already had a few careers in mind that I wanted to look further into. Through the myBlueprint surveys, I had two jobs that I wanted to be recommended, physiotherapist and family physician (doctor). Thankfully these were my top two job recommendations. After doing some research on salary, requirements, and job growth, I decided that family physician is the better fit for me. Getting into medicine has been a goal of mine since I was ten years old, and I was glad to be able to know more about the job through the assignments and the final project.

Before the start of the unit, I knew I wanted to pursue becoming a doctor but now that I know more about the job, I know for sure that it's my dream job and what I want to pursue as a career. This unit has answered a lot of questions I had before it started. I've always known that I wanted a job that helped people, and I feel a doctor is the most suitable option for me considering my interest in sciences and particularly human anatomy.
