

# Niagara Falls

Word around Town

# The Niagra Falls and other landmarks Part one

- There are a few Notable Locations other than the Niagara falls as well as other locations and events in the area like the Shaw festival and Crystal Beach
- Niagara Falls was formed by at the end of the ice age about 12,000 Years ago, The main contributor was Erosion.

Niagra Falls is a National Landmark, so it brings in tourist all over the world to see it so in bring in revenue to Ontario And Crystal Beach Was Crowned the cleanist Beach in Canada in 2016 so people might also vist as well and depending on what season it is they could also attend the shaw festival to bring in additional revenue.

# The Niagra Falls Climate

- Niagra Falls is a very warm but Rainy place, Rarely Having Snowfall or having the Temperature drop below 15 degrees

# Climate Continued

- Because of the mostly temperature you will commonly see people on the beach or Visiting Niagara falls maybe if a rainy day you can see cover in the Skylon Tower while also get another great view of the Niagara falls

# Vegatation

- Lowbush Blueberry is a Slow growing variant of the normal blueberry with advantage of the whole plant being edible. The plant's berries Can be used to make wine , while the rest of the plant can be used for tea
- Ontario also has a large sulection of Tree which could be used for lumber like pine or ash.

# Environmental Issue

First Nations Reserves in the Ontario region have been without water for the past 25 and the water they do have looks more like ice tea then water even when they do boil it, These issue were brought up by bad water purifiers poorly maintain pipes and most in importantly under prepared Technicians, the Technicians were barley taught to handle these situations one even said "They were taught by a book". This problem could be easily fixed by either bringing in experienced technicians or teaching them what to do. If the government decided to do this problem could easily be fixed last year out of the 143 broken water purifiers 87 were fixed with 56 remaining and with better taught technicians im sure this problem could be solved by 2022 and they would also stay properly maintained.
